UHF STICKER AND UHF CARD

PRODUCT NAME

YCH-UHF-L1 | YCH-UHF-L2

Model:UHF-L1

Model:UHF-L2

Function And Advantage Introduction

Stable reading distance and passive working mode

Work with PUHF-9 long range UHF reader, with 7-9m stable reading distance, we can make sure each card can be read and not lost passive working mode, no need to change battery, easy and simple application.

IP 65 waterproof level, which can be used in outside directly

IP65 waterproof level, waterproof and dustproof, which can be used in any bad environment directly.

High quality and smart design

Compare with the similar products on marketing, with high reliable quality and smart design.

With super temperature tolerance

With super temperature tolerance and which can work very well under -45 degree -70 degree

Low cost long range solution and with widely application range

Low cost long range RFID solution and everyone can afford it, which be widely used in highway charging, parking management system, vehicle plate identification system.

PRODUCT NAME

YCH-U6C-9B

Model:U6C-9B

Function And Advantage Introduction

7-9m stable reading distance, can work under -20 to 60 degree

7-9m stable reading distance, can work well under the -20-60 degree, not easy to deformation.

Low cost RFID solution, work with CS-56 Card can be fixing inside of vehicle

Low cost RFID long range reading system, everyone can afford it, work with CS-56 sticker, can fix on the front to the windshield of vehicle.

Surface can painting according to customers requirement!

Surface can be painting some photo and can help customers OEM difference photo on card surface according to customers different requirement

Can do dual frequency card

Can do dual frequency card, like UH+LF, UHF+HF, and the dual frequency card can be used in access control system for low cost RFID STOP security solution.
